

EUROSTEEL MASTER 2016

VIII Edition

Advanced
Training Course for the
European Steel Sector
16th to 20th May 2016
Terni, Italy

Organized by

CENTRO SVILUPPO MATERIALI S.P.A. &
EUROFER, INDUSTRIALL, FEDERACCIAI, ESTEP

Supported by the
EUROPEAN COMMISSION

AIMS

The EU steel industry has undergone a long period of crisis since 2008 with the consequent reduction in production, capacity and restructuring and it is still experiencing a rapid evolution. Operatives need to understand and address the operational and organizational changes driven by the technology taking place within their companies. This is essential to allow the middle management to be actively involved in the implementation of company policies and to contribute positively to on-going developments.

TARGET

The 2016 Eurosteelmater is aimed at managers, technical staff, researchers, trade unionists and other professionals operating in the steel industry and in closely related areas. University degree or equivalent experience is required.

THE APPLICATION FORM

Download from: http://www.c-s-m.it/en/events_and_courses/eurosteelmater/eurosteelmater_2015.html

Send to: eurosteelmater@c-s-m.it

REGISTRATION FEE

2,500 € (+ VAT)
